COMES TO MARRY HAWAIIAN QUEEN

Pia Salomon Arrives in San Francisco on His Way to Honolulu.

In the matrimonial plans of royalty all the world takes an interest more or less keen, and for that reason A. P. A. Salomon, or Pia Salomon, as he is known in his South Sea home, was the star passenger on the liner Mariposa, which arrived here yesterday from Tahiti. Salomon belongs to one of the first families of the Society Islands and is a descendant of a long line of famous chieftains related to Pomare, last of the rulers of Tahiti. He is said to be on his way to Honolulu to wed his boyhood sweetheart, no less a personage than Liliuokalani, Hawaii's deposed queen.

Pia Salomon is a man of mighty stature. He is tall and broad and was known in his more athletic days as the most powerful man in all the South Sea Islands. He was educated in England and while an undergraduate at Oxford first met Queen Liliuokalani, then a slender maid of delicate chocolate complexion.

Pia Salomon would not discuss the nature of his mission, but his fellow passengers say that his coming marriage with Queen Lili was the one topic of conversation among the smart set of Tahiti during the Mariposa's stay there. Salomon is wealthy and has a beautiful home near Papeete—S. F. Call, September 2.

The San Francisco Examiner says Prince Salomon admits his intending marriage to Queen Liliuokalani.

INFERIOR CLASSES SHOULD BE BARRED

That inferior classes of all nations should be barred from America, and the Japanese and Chinese not singled out as undesirable and prohibited immigrants, is the theory of Dr. David Starr Jordan, who has again settled himself in the president's chair at Stanford university after an absence of five months, the greater part of which time he spent in Australia and New Zealand, where the immigration problems are as pertinent as they are in California and where the laws are far more rigid. Dr. Jordan was in this city yesterday, attending a meeting of the board of trustees of Stanford university. On Thursday he reached this city from Boston, where he had attended a convocation of scientists.

"The 'coolie classes' of all nations should be barred from this country," said Jordan; "not only the Japanese coolies or the Chinese, but the inferior classes of European countries who can not be assimilated in this country, or who, if they are assimilated, would lower the standard. They are not capable of meeting the responsibilities of American citizenship and their numbers would be so great that they would, if unchecked, control the politics of the country. In Australia the feeling against immigration is not directed against the Japanese alone, but against all non-English speaking people."

In speaking of President Roosevelt's stand against the "nature fakers" of the William J. Long type, Jordan said

CONFIDENCE

said Lord Chatham, "is a plant of slow growth." People believe in things that they see, and in a broad sense they are right. What is sometimes called blind faith is not faith at all. There must be reason and fact to form a foundation for trust. In regard to a medicine or remedy, for example, people ask, "Has it cured others? Have cases like mine been relieved by it? Is it in harmony with the truths of modern science, and has it a record above suspicion? If so, it is worthy of confidence; and if I am ever attacked by any of the maladies for which it is commended I shall resort to it in full belief in its power to help me." On these lines

WAMPOLE'S PREPARATION has won its high reputation among medical men, and the people of all civilized countries. They trust it for the same reason that they trust in the familiar laws of nature or in the action of common things. This effective remedy is palatable as honey and contains the nutritive and curative properties of Pure Cod Liver Oil, extracted by us from fresh cod livers, combined with the Compound Syrup of Hypophosphites and the Extracts of Malt and Wild Cherry. It quickly eradicates the poisonous, disease-breeding acids and other toxic matters from the system; regulates and promotes the normal action of the organs, gives vigorous appetite and digestion, and is infallible in Prostration—following Fevers, etc., Scrofula, Influenza, Asthma, Wasting Diseases, Throat and Lung Troubles, etc. Dr. W. A. Young, of Canada, says: "Your tasteless preparation of cod liver oil has given me uniformly satisfactory results, my patients having been of all ages." It is a product of the skill and science of to-day and is successful after the old style modes of treatment have been appealed to in vain. Sold by all chemists.

that the writings of the proscribed school were humorous efforts and that the matter was not important enough to draw the fire of the president.

NAVY YARD WORK IS MUCH RUSHED

WASHINGTON, Sept. 2.—The movements of the battleship fleet of 16 vessels to the Pacific coast has resulted in orders for rush work at the Washington navy yard. The local force will be taxed to the utmost in filling the orders for the most modern guns of smaller caliber, with which type the vessels are to be equipped before they start on their long voyage.

Work also is being rushed on the submerged torpedo tubes, which are under construction at the Washington gun factory; for the larger vessels of the navy. All work must be finished by November 15. Rear Admiral Leutze is commandant and superintendent of the navy yard and gun factory.

SAN FRANCISCO PLAGUE SITUATION AS IT IS

Associated Press dispatch to San Jose Mercury and Herald:

SAN FRANCISCO, August 31.—Sensational stories of prevalence of bubonic plague in San Francisco are without foundation in fact. The exact situation is this:

Since the 18th of June, when the disease first made its appearance, eleven cases have come to light and nine deaths have resulted. The Board of Health, unanimous in its decision to assume no preventable risk, early took the situation in hand, and with the cooperation of the Board of Supervisors and the Marine Hospital Service, has adopted vigorous measures to keep the disease from spreading and to stamp it out. The city has been divided into districts, and physicians, inspectors, bacteriologists, disinfectors and helpers have been systematically assigned. The City and County Hospital, where most of the eleven patients have been treated, is quarantined and has been under thorough fumigation for a week. Even the grounds are being disinfected. This work is under the supervision of the warden, Dr. O'Neil, and Passed Assistant Surgeons Long and Stanfield of the Marine Hospital Service, all three of whom are experienced. The city is buying tents from the Government and an isolation camp is being prepared.

There is no scare. The public is aware that this disease, peculiar to all maritime cities in temperate climates, has made an appearance here, but thus far no cause for alarm has developed. The authorities, municipal and Federal, are satisfied that the prompt measures of protection and eradication that have been taken are effective and that the situation is well in hand.

CATHOLICS IN ROME ON THE DEFENSIVE

ROME, August 24.—There seems no doubt that the action of the pope in directing a suspension of the pilgrimage to Rome in connection with his jubilee, on the ground that they might be ill-received by the people in view of the present anti-clerical agitation, has a political or at least a politic object. At the Vatican there exists a strong current, having for its ending a definite suspension of all pilgrimages, and a consequent protest to the powers respecting the position of the church in Italy. M. Giolitti, the prime minister, says the government could not prevent the Vatican from persisting in representing itself as persecuted.

The anti-clerical campaign has spread like an epidemic throughout Italy. It reached its climax in the mob excesses at Spezia and Sampierdarena, where two churches were devastated. It is believed that the pope fears that Italy intends following the example of France with regard to the church. The Catholics in Rome have decided on energetic counter action if they are attacked and have placarded Rome with posters vigorously denouncing the insecurity which surrounds priests, who are constantly being insulted. The composer Perosi was spat upon in the street.

The government has shown great firmness at Spezia and declared a state of siege there.

PHILIPPINE SCOUTS MAY BE INCREASED

Inquiry at the War Department into the report from Japan that the authorities are projecting an increase of the military forces in the Philippines by the addition of thirteen regiments of native troops, to be officered by Americans, discloses the fact that the foundation for the story is a simple recommendation of General Mills, in command of the Philippine Scouts, Department of the Visayas, that the force of scouts be increased by fifty companies, which would make altogether about four regiments. The basis for the recommendation was the desire to reduce the expense of the military establishment in the Philippines instead of increasing it, for the proposed additional force of scouts were to replace an equal number of the American troops, which are much more expensive. In fact, the project involves the increase of pay of the scouts, but even with the allowance proposed the private would receive only \$8 a month for the first enlistment, and only after thirty years' service would his pay equal the \$13 a month which the American recruit receives to begin with. The scouts have been found to be easily maintained on the food of the country and to be patient and loyal at all times.—Washington Star.

YOUNG OFFICERS ON BATTLESHIPS

Only Five of Present Captains to Come Around Horn.

WASHINGTON, September 3.—Admiral Evans has taken his big battleship fleet on a cruise northward from Hampton roads. He started yesterday, leading the way with his flagship Connecticut. His announced destination is Cape Cod.

It is understood at the navy department that the fleet will make no haste in going north, but will engage in drills and various kinds of fleet and squadron evolutions on the cruise. The fall target practice is to begin next Monday and this will be the last opportunity the big ships will have to test their great guns before they drop anchor in Magdalena bay, Lower California, some time in early spring.

So far as can be learned now, the navy department has resolved to keep the following captains now in command of ships in their present positions on the cruise to Pacific coast ports: Potter of the Vermont, Vreeland of the Kansas, Osterhaus of the Connecticut and Wainwright of the Louisiana.

Among naval officers of high rank it was said yesterday that Captain McCrea, commander of the Georgia, might also be kept in command, making five of the eighteen battleship captains to stay aboard ship for this cruise. The secretary of the navy and his assistant have planned to advance the young to the fighting line and keep the elders on shore duty. The eighteen captains will command and be responsible for \$100,000,000 worth of armament and equipment. The shake-up is scheduled to occur just after the finish of the target practice and maneuvers off Cape Cod.

FINGER PRINT SYSTEM IN THE MARINE CORPS

WASHINGTON, August 24.—The system of finger-print identification, as used by the army and navy, has been adopted by the United States Marine Corps, and it is expected that the other departments of the government will have adopted the system by January 1 next.

It is stated that many of the government employees do not take kindly to the idea, but in view of the fact that the finger-print system of identification tends to the safety of the general public, no trouble is expected when the government introduces the system throughout the respective departments. The finger-print bureau is to be placed in charge of Robert McLaughry, Jr., of Leavenworth, Kas., who has developed it so extensively among Federal prisons. McLaughry took a special course in the work in Europe. He says it is the most certain way yet discovered of identification. Only two people out of every 14,000,000 have like lines on the fingers. In other words, only six people in the United States have the same kind of lines on their fingers.
